

ION-CLEANSE CLEANSING/DETOXIFICATION PROGRAM:

It literally drains toxins from your lymph nodes out of your feet in twenty to thirty minutes. It is especially effective if done right after acupuncture treatment, since the channels are all open and ready to let the toxins out.

Material or Area of the Body	Color/Particle
Detoxifying from the kidney, bladder, urinary tract, female/prostate area	Yellow-Green
Detoxifying from joints	Orange
Detoxifying from liver, tobacco, cellular debris	Brown
Detoxifying from liver	Black
Detoxifying from gallbladder	Dark Green
Lymphatic system	White Foam
Most likely yeast	White cheese-like particles
Heavy metals	Black flecks
Blood clot material	Red flecks

*The color of water will change depends on kinds of toxins that you have. \$75 per session.

How does it work?

A water molecule is composed of two hydrogen atoms and one oxygen atom. When the molecule loses a hydrogen atom, the remaining OH molecule takes on a negative charge. As you walk along the beach, your body absorbs millions of these negatively charged ions, which alkalize the blood and tissue. Because of poor diet and high stress, we tend to accumulate and store excessive quantities of waste products such as diacetic, lactic, pyruvic, uric, carbonic, acetic, butyric and heptic acids. According to Dr. Theodore Baroody, author of Alkalize Or Die, acid wastes attack joints, tissues, muscles, organs and glands causing minor to major dysfunction. He asserts that avoiding disease and maintaining vitality as we age requires the maintenance of an alkaline environment throughout the body. This is virtually impossible to accomplish in our high-tech, high-stress, toxic society unless we can walk on the beach everyday.

SIGHT RESTORED WITH ACUPUNCTURE TREATMENTS

JOHNSON & JOHNSON IN LITIGATION BLIZZARD OVER BIRTH CONTROL PATCH INJURIES AND DEATHS

Success Story: Infertility

July SPECIAL OFFER - \$75

Complete Health Analysis (\$150 value):

- **Body Fat Analysis**
- **Energetic Nutritional Test**
- **Report of Findings with Recommendations**

Energetic Nutritional Testing is a unique testing method which incorporates various muscle testing techniques, Acupoints Testing, and Emotional Release Therapy. This unique muscle testing technique can zero in on the causes of disease and the right nutritional program to correct them.

Dr. Lee has used Energetic Nutritional Testing to successfully diagnose her patients to overcome fatigue, weight problems, irritable bowels, acid reflux, high cholesterol and blood pressure, PMS, menopause symptoms and many more. She is able to effectively "crack" even the most difficult cases such as chronic allergies, inability to lose weight, reoccurring aches and pains.

Please bring a copy of this newsletter with you upon receiving care.

We can help you find out what is stressing your body: food allergy, immune challenges (bacterial, virus, parasite or Yeast), heavy metals or chemical allergy.

The Ion-Cleanse creates precisely the same environment as a walk along the beach, only more powerfully because your feet are in direct contact with the ions being manufactured in the water. Place your feet in the water, turn on the unit and within seconds, millions of ions enter your body and begin to neutralize these tissue acid wastes. Fat and mucous residues found in the water after bathing reflect the wastes that have left the body during the 20 to 30 minute session. Healthy individuals can expect to feel lighter and experience a greater sense of well being from each Ion-Cleanse session. Many people with pain, edema, gout and swollen or deteriorating joints report considerable symptomatic relief from Ion-Cleanse sessions.

Fremont (510) 792-2179

It is based on the theory that if the Qi or energy is blocked, not enough energy and blood can go to nourish the local tissue cells, then local muscle response will also be weak.

The reflex areas to check include Brain(Frontal, CSF, Crown, Cerebellum, Pituitary, Pineal, Hypothalamus, Eyes, Sinuses, Teeth, Glands, Thyroid, Para-thyroid, Lungs, Thymus, Heart, breast, Liver, gallbladder, Stomach, Pancreas, Spleen, Small Intestine, Colon, Ovaries, Testicles, Uterus, Prostate, Kidney, Bladder, Adrenals, etc..

Nutritional Dietary Counseling

Depending on your individual situation, we might also require that a patient make some specific changes in their diet and eating habits, and in their routines, in order to bring about the best possible results. Many people we see in our practice have eaten themselves into their current state of ill-health, to one degree or another. The deficiencies or imbalances lead to a breakdown in resistance or immunity and a loss of the ability to cope with environmental stresses (chemical, bacterial, or otherwise).

The good news is that it is possible to reverse the process. And my patients are very appreciative of the fact that we have a very effective system of monitoring their progress at each visit. By contrast, in medicine, the medical doctor makes a diagnosis and then uses drugs or surgery to attack or suppress the symptom or to surgically remove the “offending” organ or part. Through our analysis we determine the exact nutrients needed to supplement the patient’s diet in order to bring about improved health.

SIGHT RESTORED WITH ACUPUNCTURE TREATMENTS

Acupuncture may provide the hope of regaining sight for some who are legally blind or have severe vision problems. Reports of gains made by patients of one well-known European acupuncturist may give new light to people who have been told their condition was hopeless.

JOHNSON & JOHNSON IN LITIGATION BLIZZARD OVER BIRTH CONTROL PATCH INJURIES AND DEATHS

Johnson & Johnson is experiencing a blizzard of more than 500 lawsuits over its Ortho Evra® birth control patch, which has been linked to heart attacks, strokes, blood clots and pulmonary embolisms in users. According to reports in the media, more than

For instance, here is an account of an 18-year-old named Christian. He had been blinded as the result of an accident suffered when he was just one. Now, after receiving treatments from acupuncturist John Boel of Aulum, Jutland, in Denmark, he is able to read, bike ride and work toward a career in a precision trade.

Prior to treatments, Christian was told his condition would never improve. At best, he was able to see a faint light through one eye. Just two days after receiving his first treatment, his dad and he were enjoying lunch together and Christian asked, "Isn't there a fog in the air?" He was pointing to the steam coming from the cup of coffee. Soon after, he read numbers on license plates.

After six weeks of treatment, this is what he said of the results: "My sight grows better and better each time. This summer, my vision was so good that I started an education to be a turner (lathe operator) just like my father. The instruction is a piece of cake."

In another scenario, Kare lost half his sight years ago due to a brain hemorrhage. He had no right side normal field of vision. He lost his ability to drive a vehicle and to hold a driver's license. Now, with Acupuncture treatments received from Boel, he has experienced big improvements. He has now been given the okay from his eye specialist to get a driver's license again after many years without one.

Unfortunately, all cases treated for this condition have not responded. However, the majority have. Four additional cases out of five treated for hemorrhaging have regained full sight. In these cases, as in Christian's as well, the patients had little hope of ever seeing clearly again. And then they received Acupuncture treatments from Boel and got a new lease on sight and on life.

500 claimants are seeking "substantial compensatory and, where available, punitive damages," from Johnson & Johnson for injuries and deaths related to the product. And lawsuits over the patch are only expected to increase. Based on the millions of prescriptions written for the Ortho Evra patch since it came on the market in 2002, critics say there are thousands of victims who do not yet realize that an injury or death was caused by the patch.

Most lawsuits name as defendants patch maker Ortho-McNeil Pharmaceutical, a New Jersey based subsidiary of Johnson & Johnson. Like nearly all of the cases filed so far, these lawsuits claim that the drug company failed to adequately investigate the safety of the patch and deceived consumers about the potential dangerous side effects, including the risks of strokes and blood clots.

Patch delivers too much estrogen

The FDA approved the Ortho Evra patch in November 2001, and it quickly became one of J&J's most popular products. Once attached to the body, the patch delivers the hormones estrogen and progesterin directly into the bloodstream through the skin.

Most experts agree that the dangers of the patch stem from its delivery system. By releasing estrogen directly into the bloodstream, a woman can end up with an estrogen level of up to 60% higher than a woman taking the pill. This is partly due to the fact that the absorption rate of a pill traveling through the digestive system is much lower than the patch, which delivers estrogen 24 hours a day.

Mainly to suppress negative publicity about the Ortho patch that would have an adverse effect on sales, Johnson & Johnson attorneys have been trying to settle the Ortho Evra lawsuits almost as quickly as they are filed by offering substantial settlements that require the plaintiffs to sign a confidentiality agreement in order to keep the damaging information out of the public eye. In addition, legal experts say J&J attorneys are fully aware that the cause of the injuries and deaths alleged in the lawsuits will be easy to prove because the plaintiffs have a "signature disease," described as a condition closely linked to the use of a drug that is otherwise very rare. In this instance, they point out, blood clots, heart attacks and strokes are extremely unusual in teenagers and women of childbearing years, with the only commonality among the victims

SUCCESS STORY:

Infertility

I had been trying to conceive for 11 months - unsuccessfully. In April 2006 the doctors diagnosed me with 5 % chance of conceiving if we use IVF, 2% chance of conceiving using clomid with IUI and a 2% chance of conceiving if we just relied on Mother Nature. I tried various alternative diets which didn't seem to yield results. Finally, I decided to seek help in Chinese Medicine with Dr. Lee.

My first treatment cycle with Dr. Lee started in June 2006 which then extended until the end July. I fully committed to my good foods and herbal remedies. When it was time to test for the cycle result, I scored a 56.5% improvement. As a registered nurse, I was irritable and having headaches frequently prior to all her treatments. Many of my stress symptoms and health concerns had gone away or reduced significantly.

And after 1 1/2 months, I was able to see the two lines for the first time. My husband and I couldn't believe it. We retested 3 times. It was unbelievable. I am now on my second cycle, and I trust that Dr. Lee will make sure I'll be in good health for my baby.

Anne D., R. N.

P.S. Now nine months later, I have a healthy baby girl.
